Who we are

At Smaco Central Air Conditioning Contracting, we are committed to delivering comprehensive and advanced solutions in our field, where quality, innovation, and customer satisfaction are at the heart of everything we do. Our company was founded on a solid foundation of expertise and professionalism, with a clear vision to be a trusted and reliable partner throughout all project stages from planning and execution to final delivery. We place strong emphasis on building long-term relationships with our partners, based on trust, transparency, and mutual success.

Our Journey of Success

Over the past years, we have witnessed rapid and sustainable growth in the central air conditioning contracting sector within the Kingdom of Saudi Arabia. This growth is the result of a well-defined strategic approach, adherence to our core values, and our commitment to continuous development of our services to keep pace with market changes and evolving client requirements. Through the successful execution of numerous projects, our capabilities and expertise have expanded, enabling us to deliver high-quality solutions at competitive prices. Today, we continue to move forward with confidence, driven by ambition and a clear vision for further growth and excellence.

Our message

To become the first choice in delivering integrated engineering solutions in the field of central air conditioning across the Kingdom of Saudi Arabia.

Our mission

We are committed to delivering our services with the highest levels of quality and professionalism, ensuring a safe and efficient working environment for HVAC systems, while adhering to top quality standards and timely execution

Our Values

Professionalism

Commitment & Distinction

Reliability

Quality & Excellence

Our Objectives

Delivering best-in-class engineering solutions in the field of central air conditioning.

Expanding our geographical presence across all regions of the Kingdom of Saudi Arabia.

Building strong and sustainable partnerships with our clients and strategic partner

Managing Director's Message

STANCO

Success and excellence are the result of a clear strategic vision and well-defined goals. From this perspective, we established our company to deliver advanced and specialized solutions in the field of central air conditioning. Our journey began with a strong belief in the importance of quality, efficiency, and innovation, and a commitment to providing engineering solutions that meet the highest international standards.

Thanks to the trust of our clients and partners, we have achieved tangible successes and steady growth. We continuously strive to enhance our performance, develop our capabilities, and adopt the latest technologies to achieve a balanced equation of efficiency, excellence, and sustainability ensuring long term value for all stakeholders

Projects Director's Message

Our mission is centered on delivering advanced technical solutions that ensure comfort, reliability, and operational efficiency. We firmly believe that innovation and precision are the foundation of sustainable success, which is why we place great emphasis on execution quality at every stage of our projects. From initial planning to final delivery, our team works closely with clients to understand their needs and exceed their expectations. We are committed to continuous improvement, staying up to date with the latest technologies, and ensuring the delivery of reliable, efficient, and sustainable solutions that add real value to every project we undertake.

The image features a dark blue background with a low-angle, upward-looking view of a modern skyscraper's facade. The building's lines create a strong sense of height and perspective. The Smaco logo is positioned in the upper left, and the main title is centered on the left side, partially overlaid by a thin green horizontal line.

SMACO

**Why Smaco Company
Limited**

Competitive Pricing

We strive to offer the best value to our clients through competitive pricing, while fully adhering to approved engineering specifications and standards. Our pricing is based on the correct selection of materials, equipment capacities and HVAC units in addition to strict compliance with approved engineering guidelines and strong technical and administrative support

Quality & Accuracy

Quality and precision are at the core of everything we do. We place great emphasis on careful planning, accurate engineering design and the selection of optimal products. Our commitment extends throughout all project stages from execution to final delivery supported by efficient administrative processes to ensure high-quality outcomes and outstanding service standards

STINCO

Consultative Team

Our consultative team consists of qualified engineers who are continuously available to support clients in selecting the most suitable products and delivering high quality solutions. We prioritize ongoing training professional development, and long-term expertise to ensure excellence and sustained growth through investment in our people

Maintenance & Warranty

We ensure that all products and contracts are delivered with clear warranty and maintenance coverage, including defined warranty periods for equipment and installation works. Our engineering team remains fully committed to providing continuous support, backed by a specialized maintenance team trained to deliver services with the highest level of professionalism

Specialized Execution Departments

Our specialized execution teams possess extensive expertise in design, performance optimization, and project execution. We place strong emphasis on quality control, adherence to specifications, and the application of best engineering practices enabling us to deliver integrated solutions under experienced and qualified leadership

Air Conditioning & Cooling Systems

We work with globally recognized suppliers and manufacturers in the HVAC and cooling industry, ensuring the availability of reliable, high-quality products. Our commitment is to deliver proven solutions that meet our clients' requirements while maintaining the highest standards of performance and operational efficiency

STANCO

We Deliver Comfort

we believe comfort is not a luxury it is a necessity. Our solutions are designed to create a healthy and balanced indoor environment, enhancing quality of life through advanced technologies and carefully selected systems tailored to our clients' needs

Customer Service

We place customer satisfaction at the forefront of our priorities. Our customer service team responds promptly to inquiries and works efficiently to meet client needs. Backed by experienced engineers and dedicated after sales support, we ensure seamless communication, fast response times, and exceptional service quality.

STANCO

Our Services

Ventilation Solutions

We specialize in providing integrated ventilation solutions for commercial, industrial and residential buildings. Our services are designed in accordance with the highest engineering standards to ensure optimal indoor air quality, efficient performance, and a healthy, comfortable environment. We are fully committed to complying with local regulations and international standards while maximizing energy efficiency.

Comprehensive study and analysis of ventilation loads and requirements, followed by precise system design and selection of appropriate ventilation units in line with approved specifications and project needs.

Delivery of complete ventilation solutions including supply, exhaust, and fresh air systems, tailored to each project's functional and architectural requirements.

Our Advantages

Supply and installation of high-quality ventilation systems using reliable materials and certified components to ensure durability and operational efficiency.

Full compliance with approved ventilation standards and coordination with all relevant disciplines to ensure seamless integration within the project.

Design and Manufacture of Air Ducts

We offer advanced solutions in the design and manufacture of air ducts, delivering high-quality products that meet project requirements and comply with approved engineering standards. Our ducts are manufactured using precise techniques and certified materials to ensure efficiency, durability, and optimal airflow performance, while supporting sustainability and high execution quality

Design and fabrication of air ducts by specialized technical teams with extensive experience, ensuring accuracy, reliability and compliance with project specifications

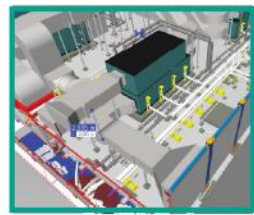

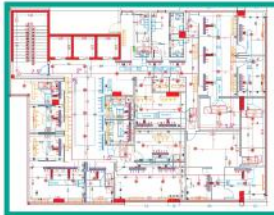

Manufacturing using high-quality galvanized steel and approved materials, in accordance with international standards such as SMACNA and ASHRAE.

Our Advantages

Provision of complete ducting systems, including fabrication, supply, and installation with careful coordination to ensure ease of installation and maintenance.

Commitment to the highest levels of quality control throughout the manufacturing and installation process, ensuring long-term performance and operational efficiency

Concealed Air Conditioning System

We provide integrated solutions for concealed air conditioning systems designed to deliver high performance with a sleek and seamless architectural appearance. This system is ideal for projects that require aesthetic flexibility, efficient air distribution, and optimal space utilization. Our solutions ensure balanced cooling, low noise levels, and long-term reliability, while reducing maintenance requirements and operating costs

Supply of high-quality concealed AC units from internationally recognized manufacturers

Testing, commissioning, and final handover in accordance with approved designs and technical specifications.

Our Advantages

Precise coordination with architectural and interior requirements to ensure seamless integration within ceilings and hidden spaces.

Delivery of complete concealed AC solutions with reliable performance and extended operational lifespan.

Package Air Conditioning System

We offer comprehensive Package AC solutions suitable for large-scale facilities and commercial projects. Our services cover all project stages, from engineering study and system design to supply, installation, testing, and commissioning. The selected systems are engineered to deliver high efficiency, consistent performance, and reliable operation under demanding conditions.

Integration with control systems and energy-saving solutions to enhance operational efficiency.

Manufacturing using high-quality galvanized steel and approved materials, in accordance with international standards such as SMACNA and ASHRAE.

Our Advantages

Supply and installation of Package AC units with high reliability and extended service life.

Complete project execution with a focus on quality, safety, and long-term sustainability.

VRF / VRV Air Conditioning System

We provide advanced VRF/VRV air conditioning solutions, recognized as one of the most efficient and flexible cooling systems available. These systems offer precise temperature control for multiple zones, reduced energy consumption, and high operational efficiency. Our solutions are ideal for residential, commercial, and mixed-use projects requiring intelligent climate control and scalability.

Supply of VRF units from leading global manufacturers, ensuring reliability and long-term performance.

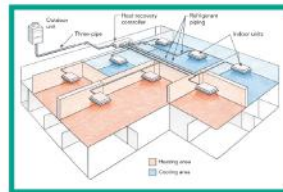

Detailed study and analysis of cooling loads for each zone to ensure accurate system design and optimal performance.

Our Advantages

Full coordination across all project phases from design to commissioning and final handover.

Seamless integration with BMS and smart control systems to enhance monitoring control, and energy efficiency.

Copper Piping Installation

We provide professional copper piping installation services for all types of air conditioning systems including split, concealed, and central systems. High-quality copper pipes are used in accordance with international standards to ensure durability, efficient refrigerant flow, and long service life. Our work includes insulation, pressure testing, and final cleaning to guarantee system reliability and performance

Compliance with project specifications, safety regulations, and best engineering practices

Thorough testing, insulation, and cleaning of piping networks to maintain performance and indoor air quality.

Our Advantages

Professional installation by skilled technicians, ensuring leak-free connections and optimal system efficiency.

Use of premium-grade copper pipes that comply with approved engineering and quality standards.

STANCO

Work Process

01

Study

We begin with a thorough site assessment and load analysis to understand project requirements accurately, ensuring the optimal selection of systems and solutions

02

Approvals

All proposed designs and technical submissions are prepared and reviewed in accordance with relevant authorities' requirements to secure approvals smoothly and efficiently

03

Engineering Design

Our engineering team develops detailed, coordinated designs that comply with approved standards, ensuring efficiency accuracy, and seamless integration with other disciplines

04

Execution

Projects are executed according to the approved designs specifications, and schedules with strict adherence to quality safety and performance standards

05

Installation

Professional installation of HVAC systems using approved methods and high-quality materials to ensure reliable and efficient operation

06

Testing & Commissioning

Comprehensive testing and commissioning are conducted to verify system performance, safety, and compliance with approved specifications before handover

07

Operation

We ensure smooth system operation through proper setup calibration, and client guidance to achieve optimal performance from day one

08

After-Sales Services

Ongoing support and after-sales services are provided to ensure long-term reliability, customer satisfaction, and sustained system efficiency

The logo for Stanco, featuring the word "STANCO" in a bold, white, sans-serif font. The letters are spaced out, and the "S" and "T" are particularly prominent. The background is a dark blue gradient with a low-angle shot of a skyscraper's facade on the right side.

STANCO

The title "Maintenance Services" in a white, sans-serif font, positioned below the Stanco logo. A horizontal teal line is positioned to the left of the text, extending from the left edge of the frame towards the start of the text.

Maintenance Services

Emergency Maintenance

We provide rapid emergency maintenance services to address unexpected breakdowns and critical issues, minimizing downtime and restoring system operation as quickly as possible

Preventive Maintenance

Our preventive maintenance programs are designed to enhance system efficiency, extend equipment lifespan, and reduce the risk of future failures through scheduled inspections and servicing.

Exhaust Fan Cleaning and Disinfection Technology

Exhaust fan cleaning and disinfection is a specialized service aimed at improving indoor air quality and ensuring the efficient performance of exhaust systems. Over time, dust and contaminants accumulate on exhaust fans, significantly reducing their efficiency and airflow capacity. This service includes cleaning both internal and external components of the fans using advanced tools and modern techniques removing accumulated dust and impurities. Disinfection is carried out using safe and effective materials to eliminate germs and bacteria. This process ensures optimal fan performance and contributes to enhancing indoor air quality within buildings.

Annual Preventive Maintenance

Annual preventive maintenance is a comprehensive service designed to maintain equipment and systems in optimal operating condition and prevent unexpected failures that may lead to operational disruptions or damage. This service includes implementing a periodic maintenance schedule with regular inspections of equipment and systems, lubrication of moving parts, necessary adjustments, and replacement of worn components before they cause issues. Preventive maintenance helps avoid major and costly breakdowns, ensures high system efficiency throughout the year, and contributes to reducing overall maintenance costs while extending the lifespan of equipment and systems.

Air Duct Cleaning and Disinfection Technology

Air duct cleaning and disinfection is a specialized service aimed at ensuring clean indoor air and maintaining the health of building occupants. Over time, dust, dirt, and pollutants accumulate in air ducts which can negatively affect air quality and contribute to the spread of contaminants and microorganisms. This service includes removing accumulated dust and debris using advanced equipment and effective techniques, cleaning and disinfecting ducts with safe and efficient materials to eliminate germs and bacteria, and ensuring that no harmful contaminants remain. This process guarantees clean and purified airflow, improves indoor air quality, and reduces health risks associated with air pollution.

Samaco Company Limited Project Execution

Samaco Company Limited has successfully delivered numerous central air-conditioning projects across various regions of the Kingdom. Our services go beyond mechanical and electrical works we focus on providing fully integrated solutions tailored to our clients' needs. The company strives to meet diverse customer requirements and reduce the complexity of dealing with multiple suppliers by establishing strong partnerships with international suppliers and their local representatives within the Kingdom. Through our commitment and reliability, we ensure seamless service delivery effective after-sales support, and smooth project execution. We are proud to present a selection of our completed projects

The image features a dark blue background with a low-angle view of several modern skyscrapers. The buildings are rendered in a semi-transparent, light blue color, creating a layered effect. The sky is a deep blue with some light, wispy clouds. The text 'STANCO' is positioned in the upper left quadrant, and 'Our projects' is centered in the middle. A thin, horizontal green line passes through the middle of the text 'Our projects'.
